Awards and Facts

- Utah AI 100 Nominee
- Catalyst Accelerator Iron Horse Cohort
- Utah-based Small Business

NAICS Codes

- 541511
- 541611
- 519190
- 541990
- 541715
- 541519

Core Products

Instantly create an AI system based solely on the data you provide
- Simply upload your documents or website and utilize our Natural Language Processing for precise answer retrieval
- Seamless interaction with content, no pre-formatting required
- Centralized knowledge repository creation and management
- Applications include Maintenance, Repair, and Operation (MRO); generational knowledge transfer; distributed organization access; etc.

AI for Proposals and Acquisitions

Our proposal and contract generator lets industry prepare proposals and responses, and helps the government create acquisition documents using AI.
- Industry users can respond to an RFP or RFI by uploading relevant information (including past proposals) about other contracts performed
- Government creates acquisition documents using previous SOWs, company information, or other acquisitions to create an AI generated document
- Result is a compliant document based on the information you provide
- 20-50X faster than current contracting processes

Differentiators

Our proprietary technology is based on leading security and privacy practices
- Can be hosted locally, on gov cloud, or accessed through the internet
- Enhanced security with bank-grade encryption (AES-256).
- Uses only closed systems, so your data remains only within your Attic
- Our custom AI systems are built from the ground up - No black box.
- Compliance with GDPR and CCPA for data privacy and security
- Lightweight models can be deployed on individual devices (tablets)

Proven Leadership Team

CEO - Bo Jonas
Over a decade as a government contracts attorney at tech companies and large defense primes. Leader in data privacy, compliance, ITAR, acquisitions. AI/ML, and emerging tech executive since 2019.

COO - Steve Jonas
Operations executive developing AI/ML since 2015. Founded EV vehicle drive-train manufacturer. Experience in finance, private equity, and tech.

CTO - Ken Allen
AI, cloud, cybersecurity, and software architecture leader at several tech companies including AWS, Proof Point, StorageCraft Technology, among others. Proven technologist providing cutting-edge solutions.

The Attic AI, Inc.

PRODUCT OFFERINGS

The Attic AI has developed several core offerings to enhance user productivity. All offerings are developed in-house using our proprietary AI models, ensuring your data is not sent to a black box. Enterprise solutions available for on-prem deployment.

The Attic Knowledge Access

AI Powered knowledge interaction through instantly created AI systems using only your data.

The Attic Fighter   (Q3 2024)

Lightweight AI-powered real-time provision of emergency procedures from aircraft on-board warnings and diagnostics.

The Attic Maintainer

AI Powered workflow, search, and knowledge access of MRO manuals and other large documentation.

The Attic Proposal

AI automated government contract proposal writing, streamlining the time spent manually writing proposals..

The Attic ACQ

Streamlined creation of acquisition documents for government contract officers (Sole Source J&A).

The Attic Archive

AI artifact information and location management access for museums, National Parks., and other archival systems.

The Attic Vision   (Q2 2024)

Computer vision & analytics software designed to work in conjunction with AR/VR systems for maintenance work, safety, and quality assurance.

The Attic Custom

Custom designed and trained Large Language Models, Targeted Small Language Models (TSLM), and Mixture of Expert systems.
