Products

- The Attic Knowledge Access: Knowledge interaction through instantly created AI using only your data
- The Attic Fighter: Lightweight real-time provision of emergency procedures from aircraft on-board warnings and diagnostics
- The Attic Maintainer: AI powered workflow and search of MRO manuals and other documentation
- The Attic ACQ: Streamlined acquisition documents (Sole Source Justification and Approval)
- The Attic Proposal: GovCon proposal writing through AI
- The Attic Archive: AI artifact information and location management access for museums, parks, and archives
- The Attic Vision: Computer vision & analytics for AR/VR
- The Attic Custom: Custom LLM, Targeted Small Language Models, and AI systems

The Attic Description

- Artificial Intelligence System to manage your knowledge
 - Created Instantly
 - Uses only your data
- Enables organizations to share their data across distributed workforces
- Transfers knowledge between generations to capture tribal knowledge and experience
- Streamlines workflows for acquisitions using AI content generation
- Enables AI powered access to repair and maintenance documentation

Features and Benefits

- Uses proprietary targeted small language models and multiple-agent approach
- Can be hosted locally, on AWS gov or Azure Gov, or via web
 - Lightweight models can be deployed on tablets
- Available as a subscription, enterprise, or license with custom setup and integration
- Cutting-edge security, data encryption, and data privacy
- Your data is only used for your purpose and is not used by The Attic for training any models
- Increased speed for access to information
- Save manpower through AI drafting and prevention of rework
